PROFESSIONAL EXPERIENCE

Self-employed entrepreneurs: Web application design and web security – 2025

- Full-stack web development (JS / React / Vue)
- Secure, scalable application design
- E-commerce development (Stripe, APIs)
- OWASP-based security practices
- End-to-end project execution for real clients

Application, Integration, and Monitoring Developer Technician – Everdyn 2023/2025 (apprenticeship)

- Commissioning – Dynamic selection component (Dior/LVMH): development of a smart ComboBox connected to the MES (C#/.NET, SQL) with data filtering/validation, improving input speed and operator reliability.
- Automation traceability (LVMH): creation of a C# + SQL module to log automation usage and identify users (event traceability).
- Migration of supervision views (Sanofi): upgrade and redesign of HMI/SCADA screens during a software upgrade at an industrial site; recovery of synoptics, testing, acceptance, and delivery in a constrained environment. (AVEVA/Wonderware)

Seasonal jobs

- Hospital Service Agent – Fleyriat Hospital, Bourg-en-Bresse 07/08-2025
- Waiter/Runner – Maison B, Bourg-en-Bresse 07/08-2023
- Guesthouse Receptionist – Le Moulin de Champagne 07/08-2022

PERSONAL ACHIEVEMENTS

- Portfolios in production (arthur-boda.fr, kyomu.fr): front-end design (HTML, CSS, JS) and deployment via OVH (hosting, DNS, configuration, online publishing).
- Expense management web application (BTS): complete HTML/CSS/JS, PHP, SQL app for entering/viewing expenses (accommodation, meals, etc.), with forms, validation rules, and database persistence.
- Android mobile application – expense management: native Java/XML implementation incorporating the key features of the web app, with adapted Android UI and entry/viewing logic.

ROUTE

Sciences-universitaire Lyon 2023/2025
